

Epson TM-T20III

Activating the internal USB interface

Operation of the FEED button:

SHORT = a quick press of the button (less than 1 second)

LONG = pressing and holding the button (for more than 1 second)

Activate configuration mode

Please perform a self test (turn the printer on while pressing the FEED button). The current configuration will be printed out.

To enter mode selection, please press the FEED button **1x LONG**. You have now activated the configuration mode.

User-defined properties

Please choose option 3 (Customize Value Settings) by pressing the FEED button **3x SHORT**, and then **1x LONG** to confirm your menu choice.

Interface Settings

Now press **2x SHORT** and **1x LONG** until the next printout.

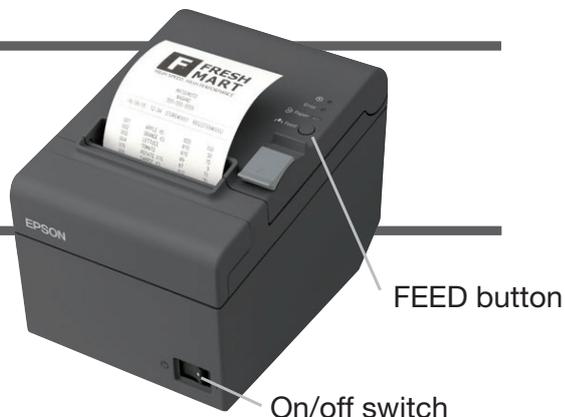

Select interface

Select option (Interface Selection) by pressing the FEED button **14x SHORT**, and then **1x LONG** to confirm your menu choice.

Activate interface

If you wish to use the built-in USB, please choose option 2 (Build-in USB) by pressing the FEED button **2x SHORT**, and then **1x LONG** to confirm your menu choice. Now the device is configured for the internal USB.

DONE!
